

MARKET COMPLAINT NOTIFICATION

Submitted to the Marketing Authorisation Holder under EU GMP Chapter 8

1. COMPLAINANT DETAILS

Complaint raised by	Dr. Helen Marsh, Chief Pharmacist
Organisation	St. Alban's Teaching Hospital, Pharmacy Department
Contact	pharmacy@stalbans.example
Country	United Kingdom
Reference	SATH/PHARM/CMP/2026/117
Date of complaint	08 September 2026

2. PRODUCT CONCERNED

Product Name	Levothyroxine Sodium Tablets
Strength	50 mcg
Dosage form	Tablet
Batch No.	LEV2604A
Mfg. Date	11 Feb 2025
Exp. Date	Jan 2027
Quantity affected	14 strips
Sample available	Yes - held in dispensary quarantine

3. DESCRIPTION OF DEFECT

During a routine dispensary stock check on 05 September 2026 our technician identified that the outer carton declares a strength of 50 mcg while the blister foil overprint on fourteen strips reads 25 mcg. The tablet debossing could not be used to confirm the true strength visually. No units from the affected strips have been dispensed to patients.

We consider this a potentially serious labelling discrepancy given that levothyroxine is a narrow therapeutic index product, and we request an urgent assessment of whether other batches in the same packaging campaign are affected. The stock has been isolated in a quarantine bin within the dispensary and is available for collection by your courier.

Dr. Helen Marsh — Chief Pharmacist — 08 September 2026
